Code Runners is a boutique software development company that offers Software and Data Services (https://www.code-runners.com/). Our projects are primarily in the Marketing, Data Analytics, Visualization and Consumer health domain. We like to be challenged by complex projects with tight deadlines and work together as a team to deal with them. Would you like to join us in our journey to be our best? We're looking for **QA specialists** to join our software development team in Sofia.

RESPONSIBILITIES

- Analyze and review software requirements
- Write and/or run unit tests, integration tests, performance tests
- Write and execute manual test cases
- Maintain existing manual test cases
- Find and track bugs in software applications
- Work together with the BA, PM and developers to clarify the expected behaviour
- Participate in project planning, reviews and retrospectives
- Conduct specialized training and workshops with all levels of stakeholders teaching them how to use our systems (may include traveling to customer locations and liaising with local teams)

QUALIFICATIONS

- At least 2 years of professional experience in web quality assurance
- General software development knowledge
- General understanding of the Microsoft web development toolchain and frontend frameworks
- Understanding of database design and architecture
- Good written and spoken English
- Demonstrated emotional intelligence, self motivation and willingness to advance

PREFERRED QUALIFICATIONS

- University degree in the area of Informatics, Computer Systems or Information Technologies
- Experience with integration or performance testing
- Software development knowledge
- Experience or theoretical knowledge sufficient to advance towards an automation QA role
- Relevant certificate, e.g. ISTQB

Work hard, play hard
